English C1 · Polish B2 · Ukrainian & Russian native · EU work rights in Poland · B2B · Open to remote / hybrid / on-site

PROFESSIONAL SUMMARY

QA Engineer with 3.5+ years of hands-on quality ownership across 12 web, mobile, API and connected-device products in 6 industries, with a strong focus on healthcare: dental cloud software, oncology patient support, smoking cessation, family planning and medical research apps. QA Lead for the Sensei Cloud (Carestream Dental) QA team. Sole QA on 9 products and responsible for end-to-end QA across up to 5 parallel release streams. Validates requirements before development, designs test cases with traceability, runs integration and regression testing on web, REST API and mobile, and documents defects and test results. Automates API regression checks with scripted Postman collections and uses AI-assisted testing (Claude, ChatGPT, mabl); building Python test automation skills with pytest and Playwright. Biomedical Engineering and Computer Science expert at NAQA, conducting standards-based accreditation audits.

CORE SKILLS

Quality Engineering	Test strategy & planning · requirements analysis & traceability · test case design · functional · integration · regression · smoke · sanity · exploratory · API · accessibility · compatibility · device/IoT integration · defect analysis · release validation
Product & Analysis	User-story validation · acceptance criteria/testability · Mixpanel analytics QA · product-improvement input · stakeholder demos · root-cause analysis
Automation & AI	Postman test scripts · Claude Code · ChatGPT · MCP workflows · AI-assisted test generation/maintenance · automated smoke/regression workflows · recurring-check automation · Python · pytest & Playwright UI tests · Selenium · Kotlin
Tools	Jira · Confluence · Azure DevOps · Jenkins (CI/CD) · Git · TestFlight · Firebase · inSyncHub · Android Studio · Visual Studio · IntelliJ IDEA · Postman · Swagger · browser DevTools · Django Admin
Platforms	Web · iOS · Android · Flutter (cross-platform) · Windows · Linux · emulators · simulators · real devices · wearables · telecom routers · BLE beacons · PLCnext (simulated controllers)

SELECTED IMPACT

- Reduced regression and smoke cycles by ~50% (from 2 days to 1) by introducing AI-assisted testing with Claude and ChatGPT, redirecting time into edge cases and deeper feature coverage.
- Accelerated test-case and bug-report creation by ~5× through Claude MCP with Azure DevOps workflows and standardized defect documentation, giving developers clearer reproduction context and reducing follow-up clarification.
- Built QA strategy and testing processes from scratch for 5 client projects across diverse domains; served as sole QA on 9 of 12 products, managing up to 5 concurrent projects for different clients, and closed up to 30 tickets per day during peak release periods.
- Owned access-control regression testing across TelCloud and its sub-products (TelcoBill, GovTelco, Agent Portal), validating ~2,000 role-permission combinations and identifying pre-release authorization gaps that could expose data beyond users' assigned access levels.
- Identified a critical access-control vulnerability in a patient-facing healthcare app that let external users without granted permissions access the platform; reported it before release and verified the fix.

EXPERIENCE

QA Engineer · i2a Solutions — Feb 2023 – Present

12 products across healthcare, telecom, travel, sports, legal and education, including accessibility-focused products · Web, iOS, Android, API and connected devices

- QA Lead for the Sensei Cloud (Carestream Dental) QA team: onboard and mentor new team members, including a new QA Automation engineer, and set the team's testing priorities; run cross-team QA syncs on best practices and AI tools and give sprint updates to leadership, including the VP.
- Owned end-to-end QA across multiple Agile/Scrum teams, from requirement review and test planning through release validation and sign-off; progressed from short-cycle white-label apps to long-running enterprise products including Sensei Cloud, TelCloud and TripBucket.
- Designed and maintained test plans and test-case libraries for 5 projects, using risk-based prioritization to preserve depth on the most critical areas when multiple releases overlapped.
- Tested REST APIs with Postman and Swagger and automated API regression checks with scripted Postman collections, alongside integration and regression testing of web and mobile clients.
- Working on a CI optimisation initiative on Sensei Cloud, including an internal desktop tool that automates Jenkins builds and promotions; take part in the code-review and PR-approval flow as QA.
- Partnered with Product Owners before development to validate user stories, completeness and testability of requirements; recently took on business-analysis tasks for product improvements and new feature adoption, including validating Mixpanel tracking and whether collected data supports the intended analysis.

- Improved defect reporting by standardizing reproduction steps, evidence and expected/actual behavior, giving developers a clearer picture of what needs to be fixed and creating a more consistent QA workflow across projects.
- Investigated complex iOS/Android defects reported by live users when the original description is insufficient: clarified device/version/state and action sequence, reproduced the issue, and traced it to a root-cause scenario instead of logging symptoms only.
- Caught pre-release security, privacy and performance defects in healthcare and government telecom products, preventing sensitive-data issues from reaching production and reducing incident and regulatory risk.
- Introduced AI-assisted testing (Claude, ChatGPT) and automation of repetitive QA work; currently automating recurring checks such as product-price display validation to reduce manual regression effort.
- Onboarded and mentored 10 QA engineers, ran knowledge-sharing sessions, taught developers Jenkins and development workflow steps, facilitated stakeholder demos, and supported clean project handovers.

ADDITIONAL EXPERIENCE

Higher Education Quality Assurance Expert · NAQA — National Agency for Higher Education Quality Assurance

Nov 2023 – Present

Expert in Biomedical Engineering and Computer Science · part-time expert appointment · Ministry of Education and Science of Ukraine

- Conducted 5 accreditation evaluations of Computer Science, Computer Engineering and Biomedical Engineering programmes as standards-based compliance audits against national higher-education standards.
- Identified critical non-compliances in curriculum, staffing and institutional practices that directly informed official accreditation decisions; authored expert commission reports published by NAQA.

SELECTED PROJECTS

Sensei Cloud (Carestream Dental) — Healthcare · Web/API · functional and API testing, requirement validation, AI-assisted QA, demos and onboarding · Azure DevOps, Jenkins.

TelCloud (Tantamount Software) — Government and private telecom services · Web/API/hardware · router provisioning, sensitive-data and release validation · Jira, Confluence.

Guru Experience Co. — Mobile/AR · iOS/Android · BLE beacon-triggered augmented-reality experiences for museum and virtual-museum apps

Nadi — Accessibility · iOS/Android/Web · assistive audio product for users with hearing loss; Bluetooth headphone and device testing.

Athelo Health — Oncology patient support · iOS/Android/API/wearables · symptom and activity tracking, device integrations · TestFlight, Firebase, inSyncHub.

QuitBuddy (Meharry Medical College) — Healthcare · smoking-cessation app · iOS/Android UI testing, location recognition.

Kenya Family Planning — Healthcare · family-planning app · cross-platform Flutter app testing on iOS/Android.

Cardea Survey (XCelable) — Medical research · survey app for medical studies · iOS/Android app testing.

EDUCATION & CERTIFICATIONS

MSc — Biomedical Engineering · National Aerospace University | *Sep 2026 – Dec 2027*

BSc, 1st Class Honours — Computer Technology in Medicine and Biology · National Aerospace University | *Sep 2021 – Jun 2025*

Erasmus+ exchange — Computer Science · West Pomeranian University of Technology, Poland | *2024*

NAWA exchange — Biotechnology · Częstochowa University of Technology, Poland | *2022 – 2023*

Medical Device Regulation (MDR): Intro for Device Designers, incl. Software in the MDR and an introduction to IEC 62304 — Udemy (Oct 2026) • EF SET English Certificate — C1 Advanced (2026) • Business Analyst — Genius.Space (Jan 2026) • Creation and Development of IT Products — Genesis / Ministry of Education and Science of Ukraine / KSE (Aug 2024) • Automation Software Testing — GlobalLogic & Prometheus, passed with honours (Jan 2024)
